INTRODUCTION

The 1981 edition of **Management Statistics for U.S. Courts** represents a composite of the most comparable statistics on the workload of federal judges. These statistics are compiled from reports submitted by the clerks of the U.S. courts to the Administrative Office of the United States Courts.

The data selected for this report and the general format are approved by the Subcommittee on Judicial Statistics. The information contained in this and previous reports is the basis for the Biennial Judgeship Survey conducted by the Subcommittee of the Judicial Conference Court Administration Committee. The one page devoted to each district and appeals court supplies statistical data on docket conditions for the years ended June 30, 1976 through 1981.

District court workload figures are divided by the number of authorized judgeship positions in each court to provide the workload per judgeship. Cases in the courts of appeals are generally handled by panels of three judges. Consequently, workload figures in the courts of appeals are shown per panel. The per judgeship and per panel figures virtually eliminate the influence of court size and allow comparison between courts of different sizes.

The national profile for the courts of appeals is on the foldout at page 13. The national caseload totals and averages for the district courts are displayed on the last page of this report. When comparing these national averages to the averages for a particular court, caution is required since unique circumstances not reflected in the statistical profile could cause a court to vary substantially from the national average. Examples are long-term judgeship vacancies, an unusual case in progress requiring the full time service of one judge, a relatively high number of senior judges augmenting regular judgeship strength, and administrative burdens of chief judges in the large metropolitan courts.

The next two pages provide detailed explanations on the data contained in the statistical profiles for the appeals and district courts. Pages 13 and 129 of this report present a more complete explanation of specific judicial workload statistics. Please refer to these pages before using this report.

**WHAT THE DISTRICT'S
NUMERICAL
STANDINGS
MEAN**

These show where an individual district court stands in relation to other district courts in the circuit and in the country. All "workload" statistics are ranked in descending order (highest value receives rank of 1) and all other statistics are ranked in ascending order (lowest value is ranked first). In some categories fewer than 95 courts are ranked because the information was not available for all districts.

ACTIONS PER PANEL

The workload statistics for the courts of appeals are presented as "actions per panel" as compared to the "actions per judgeship" profile used for the district courts. This type of profile provides a more accurate indication of the workload of an individual judge since appeals cases are generally handled by a panel of three judges rather than a single judge.

TERMINATIONS AFTER HEARING OR SUBMISSION

Cases reported terminated after oral hearing or submission on briefs meet the following criteria:

1. filing of the complete record,
2. filing of brief under Rule 28, Federal Rules of Appellate Procedure,
3. a reported date of either an oral hearing or submission, and
4. reported date of termination.

Any record which does not meet all four of these requirements is included in the group of cases terminated "without hearing or submission."

CRIMINAL WORKLOAD STATISTICS

Criminal data for 1976 - 1979 excludes minor and petty offenses. All other misdemeanors are included. In 1979 the Federal Magistrates Act expanded the authority of magistrates to dispose of all misdemeanors. Consequently, only felonies are included in the 1980 and 1981 criminal data. Filings in the "Overall Workload Statistics" section include criminal transfers, while filings classified in the "by nature of suit" section do not.

WEIGHTED FILINGS

The weighted filings figures for 1979 - 1981 were based on weights developed from the 1979 Time Study conducted by the Federal Judicial Center. Weighted filings for 1976 - 1978 were based on weights established by the 1969 Time Study. A detailed discussion of the 1979 Time Study can be found in **1979 Federal District Court Time Study**, published by the Federal Judicial Center in October 1980.

TRIALABLE FELONY DEFENDANTS IN PENDING CRIMINAL CASES

The classification criteria for triable felony defendants was changed this year. Because this is a workload report persons in certain Speedy Trial exclusions under Title 18 U.S.C. Section 3161(h) are considered part of the district's criminal workload; therefore, such defendants are counted as triable along with those available for plea or trial. The figures for all years in this report then, exclude only defendants who were fugitives on June 30, awaiting sentence after conviction, committed for observation and study, waiting trial on state or other federal charges, mentally incompetent to stand trial, or defendant for whom an authorization of dismissal had been requested by the U.S. Attorney to the Department of Justice.
